FUEL TYPES AVAILABLE FROM RENEWABLE FUELS LTD

SHORT ROTATION COPPICE - WILLOW

We supply elite variety cuttings of Energy Crops in the form of SRC willow from our sister company in Sweden who has over 20 years experience in Willow breeding.

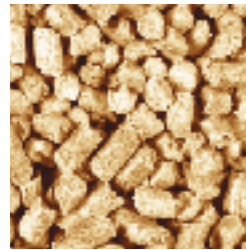

OLIVE RESIDUE

Versatile, high-energy fuel source imported from Europe and co-fired in UK power stations. Supplied as a simple stone cake made from dried, broken down olive stones, or as a stone residue made from a mixture of stone and pulp.

FOREST PRODUCED BIOMASS

Small roundwood produced in the UK and processed into forest wood chips to be used in co-firing applications in coal fired power stations, or in smaller biomass boilers.

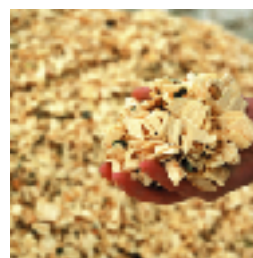

WOOD PELLETS

Premium grade Wood Pellets produced by our parent company in Sweden, SBE Svensk BrikettEnergi AB. Made from pure virgin sawdust with no gluing agents or contaminated timber. Used in specialist boiler systems and pellet stoves, providing a very efficient and clean heating fuel. Also co-fired in UK power stations.

HEAT LOGS

Sawdust Heat Logs supplied by our parent company, SBE Svensk BrikettEnergi AB. Made from pure virgin sawdust with no gluing agents or contaminated timber. Clean, convenient heating fuel, compatible with wood burning and multi fuel stoves.

SAWMILL CO-PRODUCTS

Sawdust and profile chips from sawmill processing timber.
