PROFILE AND OBJECTIVES

"The Renewable Obligation is the key policy mechanism by which the Government is encouraging the growth necessary to reach the UK's renewable energy targets. The aim is that by 2010 10% of the UK's electricity should be supplied from renewable sources". DTI

Our primary objective is to become the leading supplier of quality biomass fuels throughout the UK for both power station and smaller users alike. Through continued research into logistics, new fuels, economics and crop yields we aim to become the leading authority on the potential for biomass projects.

Key Objectives to assist Power Stations

- Providing a wide range of quality biomass fuels, derived from the UK and European agricultural, forest and sawmill industries.
- Continued development into new fuels and supply chains to increase fuel effectiveness and reduce cost.
- Management of fuels supply logistics ensuring efficient delivery of quality fuels.

Key Objectives to assist Fuel Growers

- Providing long-term contracts for sustainable fuel supply.
- Establishment, management and harvesting of high quality, high yielding Energy Crops in the form of Short Rotation Coppice Willow.
- Feasibility studies to assess land for the potential of biomass production.
- The improvement of energy crop yields by up to 50% by 2012 through continued selection and trialing.

Printed on environmentally friendly paper.

Renewable Fuels Ltd looks to the future of biomass energy in the UK, providing a sustainable fuel supply in a rapidly developing industry. We can offer guidance and expertise at every stage of a fuel supply project.
